EXAMINER'S AMENDMENT

1. In response to the BPAI Decision filed, 29 August 2011, of application filed, with the above serial number, on 26 January 2000 in which the rejection of claims 1-2, 4-7, 10-19, 21-24, 27-36, 38-53, 55-58, and 61-68 has been affirmed and the rejection of claims 3, 8, 9, 20, 25, 26, 37, 54, 59, and 60 has been reversed.
2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the claims:

1-2. (cancelled)

3. (currently amended) A method to manage congestion in a network, the method comprising:

determining a congestion status associated with a node in a single peer group or a hierarchical level in the network, the congestion status being represented by a transit flag accessible to at least one other node in the single peer group or the hierarchical level to determine if a call is routed through the node; and

broadcasting the congestion status from the node to the at least one other node in the single peer group or the hierarchical level.[.]

~~The method of claim 1~~

wherein determining the congestion status comprises:

setting the transit flag, if the congestion status indicates a congestion, to indicate that a call through the node is avoided unless the node is a terminating node; and

resetting the transit flag, if the congestion status does not indicate a congestion, to indicate that the node is not restricted for transit.

4-7. (cancelled)

10-19. (cancelled)

20. (currently amended) A computer program product comprising:

a non-transitory computer usable medium having computer program code embodied therein for managing congestion in a network, the computer program product having:

computer readable program code for determining a congestion status associated with a node in a single peer group or a hierarchical level in the network, the congestion status being represented by a transit flag accessible to at least one other node in the single peer group or the hierarchical level to determine if a call is routed through the node; and

computer readable program code for broadcasting the congestion status from the node to the at least one other node in the single peer group or the hierarchical level.[.]

~~The computer program product of claim 18~~

wherein the computer readable program code for determining the congestion status comprises:

computer readable program code for setting the transit flag, if the congestion status indicates a congestion, to indicate that a call through the node is avoided unless the node is a terminating node; and

computer readable program code for resetting the transit flag, if the congestion status does not indicate a congestion, to indicate that the node is not restricted for transit.

21-24. (cancelled)

27-36. (cancelled)

37. (currently amended) A system interfacing to a network comprising:

a processor coupled to the network; and

a memory coupled to the processor, the memory containing program code for managing congestion in the network, the program code when executed causing the processor to:

determine a congestion status associated with a node in a single peer group or a hierarchical level in the network, the congestion status being represented by a transit flag accessible to at least one other node in the single peer group or the hierarchical level to determine if a call is routed through the node; and

broadcast the congestion status from the node to the at least one other node in the single peer group or the hierarchical level.[.]

The system of claim 35

wherein the program code causing the processor to determine the congestion status causes the processor to:

set the transit flag, if the congestion status indicates a congestion, to indicate that a call through the node is avoided unless the node is a terminating node; and

reset the transit flag, if the congestion status does not indicate a congestion, to indicate that the node is not restricted for transit.

38-53. (cancelled)

54. (currently amended) An apparatus to manage congestion in a network comprising:

means for determining a congestion status associated with a node in a single peer group or a hierarchical level in the network, the congestion status being represented by a transit flag accessible to at least one other node in the single peer group or the hierarchical level to determine if a call is routed through the node; and

means for broadcasting the congestion status from the node to the at least one other node in the single peer group or the hierarchical level.[.]

~~The apparatus of claim 52~~ wherein the means for determining the congestion status comprises:

means for setting the transit flag, if the congestion status indicates a congestion, to indicate that a call through the node is avoided unless the node is a terminating node; and

means for resetting the transit flag, if the congestion status does not indicate a congestion, to indicate that the node is not restricted for transit.

55-58. (cancelled)

61-68. (cancelled)

The following is an examiner's statement of reasons for allowance: The Board of Patent Appeals and Interferences affirmed the rejection(s) against independent claim(s) 1, 10, 18, 27, 35, 44, 52, 61, and thus claims 10, 27, 44, and 61 and all claims dependent thereon are herein cancelled, but reversed all rejections against claim(s) 3, 8, 9, 20, 25, 26, 37, 54, 59, and 60 dependent thereon, wherein the Board determined that the "Examiner erred in finding that Fukuta and Proctor disclose avoiding sending a call through the congested node unless the node is a terminating node, as recited in claims 3, 20, 37, and 54". The Examiner has consequently amended the claims in accordance with the MPEP section 1214.06. Prosecution is closed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
